VORWORT.

Dreizehn jahre sind verstrichen, seit der zweite band dieser sammlung zur ausgabe gelangte. zwar bin ich alsbald an die bearbeitung des dritten gegangen und habe bis ostern 1884 *alle meine freie zeit ihr gewidmet; immer deutlicher erkannte ich aber, dass mit den verfügbaren hilfsmitteln eine befriedigende sichtung des weitschichtigen stoffes sich nicht erzielen liefs. denn an festen anhaltspuncten zur bestimmung der ursprünglichen folge und des wahren sinnes der einzelnen gll., wie sie für die beiden ersten bände in der textgestalt der zu grunde liegenden autoren gegeben gewesen waren, gebrach es nunmehr völlig; des öfteren übertrafen die lateinischen stichworte ihre deutschen aequivalente noch an dunkelheit und verderbnis. darum erschien es angezeigt, das in vorbereitung begriffene Corpus glossariorum latinorum abzuwarten: auf seiner basis würde, so hoffte ich, die lösung mancher schwierigkeit gelingen. mittler weile beschäftigten mich neben der herstellung neuer collegien eingehende studien über mhd. reimtechnik. sie waren noch zu keinem abschluss gediehen, als ich aufgefordert wurde, die dritte auflage von Müllenhoffs und Scherers Denkmälern zu besorgen. auch diese arbeit, der ich aus pietätsgründen mich nicht entziehen zu dürfen glaubte, muste wie überhaupt alle wissenschaftliche tätigkeit während des jahres ruhen, in welchem ich das prorectorat unserer hochschule zu führen hatte. erst vom spätherbst* 1890 *an und nachdem es mir endlich geglückt war, das drückende joch der redaction der Zeitschrift f. d. altertum abzuschütteln, vermochte ich meine volle kraft in den dienst der Denkmäler zu stellen.*

Inzwischen waren mehrere bände des Corpus glossariorum latinorum veröffentlicht worden. ihre durchsicht enttäuschte mich in hohem grade. weniger deshalb, weil der blick der herausgeber einseitig nach rückwärts, auf das klassische altertum, nicht auch nach vorwärts, auf das mittelalter, sich richtet, sondern namentlich darum, weil das material ganz roh, ohne jede verarbeitung, ohne alle besserungsversuche, verweise und erläuterungen geboten und irgendwelche vollständigkeit der handschriftlichen grundlagen nicht einmal angestrebt wird: nur zum kleinsten teile werden diesen übelständen die geplanten register abhelfen können. immerhin aber ermöglichten auf der einen seite die im dritten Corpusband abgedruckten botanisch-medizinischen vocabulare eine behandlung der deutschen

kräuterverzeichnisse: die durchsicht der noten auf s. 469—587 *des vorliegenden bandes wird jedermann davon überzeugen, dass ohne jene alten glossare, in wie unzulänglicher gestalt sie auch vorliegen, der ganze Pflanzenreich überschriebene abschnitt ein wirres, unverständliches chaos hätte bleiben müssen. auf der andern seite ersah ich, dass von der klassischen philologie weitere aufschlüsse über provenienz und werdeprocess der meisten sonst in betracht kommenden glossengruppen vorläufig nicht zu erhoffen ständen. so entfiel jeder stichhaltige grund, die fortsetzung meines werkes noch länger hinauszuschieben: ich nahm daher die arbeit wider auf, nachdem der druck der Denkmäler beendet war.*

Zunächst erwies eine modification der früher in aussicht genommenen gliederung des stoffes sich als notwendig. im vorwort zum ersten teil s. X *hatte es geheifsen: 'der dritte band bringt die alphabetischen, nicht zu nachweisbaren einzelwerken gehörigen, und die nach sachlichen categorien geordneten vocabulare sowie die tier- und pflanzennamen'. aber seit* 1879 *war der glossenvorrat so stark angewachsen, dass zu seiner bewältigung ein band nicht ausreichte, falls nicht ein höchst unhandlicher wälzer von weit über sechszig bogen entstehen sollte. ferner durften die alphabetischen vocabulare ihren platz nicht vor, sondern musten ihn hinter den sachlichen erhalten, da mancher abschnitt auch von diesen (zb. das elfte buch des Summarium) alphabetisch angelegt ist. daher umfasst jetzt der dritte band nur die sachlich geordneten glossare, während die alphabetischen nebst den Adespotis, den nachträgen zu band* 1. 2 *und den hssbeschreibungen die erste hälfte des vierten einzunehmen bestimmt sind, welche, so gott will, ende des jahres* 1896 *erscheinen wird.*

Mit der geringen ausbeute, welche das Corpus glossariorum latinorum für die hauptmasse der deutschen sachglossare gewährt, hängt deren von mir getroffene anordnung zusammen. indem sie dem zufällig erhaltenen höchst lückenhaften material sich anpasst, bleibt sie eine rein äufserliche; den inneren zusammenhängen der verschiedenen sammlungen unter einander vermag sie nicht gerecht zu werden, weil mangels reichlicher alter formen die verbindenden fäden sich zwar ahnen aber nicht blofs legen lassen. neue funde können daher das gewählte ordnungsprincip leicht durchbrechen oder doch kreuzen. ich unterscheide drei abteilungen: Gruppenglossare, Einzelglossare und Mischungen — die namen gebe ich übrigens gerne preis, wenn jemand sie mit besseren vertauschen will —, von denen die beiden letzteren eng zusammengehören. unter Mischungen verstehe ich conglomerate und reste verschiedener einzelglossare, die reinliche sonderung nicht mehr gestatten, oder auszüge aus solchen, die in ihrer willkür und kürze das bild der ursprünglichen anlage bis zur unkenntlichkeit verwischt haben. wie derartige mischungen entstanden, ist unschwer zu begreifen, wenn man beispielsweise den Clm. 14689 (Bibl. 7. Em. 31. *bei Graff) sich vergegenwärtigt. hinter gll. zu biblischen und profanen büchern enthält er eine reihe sachlicher vocabulare. neben ihnen wurden bl.* 46^{b}—48^{a} *an den obern, untern und seitenrändern, zum teil von andern händen und der gestalt, dass die spätern schreiber jeden von ihren vor-*

gängern frei gelassenen raum ängstlich ausnutzten, analoge glossen in menge eingetragen. hält man text- und marginalgll. streng aus einander und berücksichtigt die verschiedene dinte sowie den divergierenden ductus der randschriften, so bereitet die sonderung der bestandteile keine wesentliche schwierigkeit. stellt man sich indes vor, die bll. 46ᵇ—48ᵃ *wären copiert und dabei der inhalt der marginalien in den text übernommen worden, so hätte ein aggregat sich gebildet, dessen elemente nur in dem ausnahmefall von einander zu scheiden wären, dass die mehrzahl zugleich in einzelfassungen vorläge.*

Aber die den principien meiner sammlung gemäfse herausschälung der einzelglossare liefs sich ohne schaden dort nicht bewerkstelligen, wo die vereinigung mehrerer nicht sache des blinden ungefährs und der schreiberwillkür war, sondern wo sie auf die bewuste tätigkeit eines bestimmten individuums zurückgieng: nicht also beim Summarium Heinrici, bei den Hildegardgll., bei den gll. zu Herrads Hortus. auch für den Vocabularius SGalli und die Casseler gll. mit ihrem einheitlichen sprachcharacter empfahl sich eine trennung wenig. die genannten denkmäler brachte ich daher ungeteilt zum abdruck und gab ihnen die bezeichnung Gruppenglossare. aufser einigen anderen stücken gesellte ich ihnen die gll. zu den hexametrischen verzeichnissen der tier-, baum- und kräuternamen bei: eigentlich hätten diese in den zweiten band gehört, fanden aber dorthinein nicht aufnahme, weil das bis 1882 *angesammelte material noch sehr der erweiterung bedürftig erschien. innerhalb der Gruppenglossare ist die folge eine chronologische: sdarum empfiengen die eben erwähnten gll. ihren platz vor dem Summarium, das sie benutzt hat. ich bestreite nicht, dass die gränzen der drei abteilungen dehnbarer natur sind und dass hin und wider zweifel darüber bestehen kann, ob ein text zweckmäfsiger unter den Gruppenglossaren oder aufgelöst unter den Einzelglossaren einzureihen war. die individualität oder, richtiger gesagt, die stupidität des redactors der Wiener hs.* 804 *und der mit ihr auf der gleichen fehlerhaften vorlage beruhenden Würzburger* Mp. th. 4⁰ 60 *würde bei aufnahme beider mss. in die Gruppenglossare deutlicher in die augen gefallen sein; ich zog einordnung in die Einzelglossare deshalb vor, weil ihre meisten abschnitte sich als überarbeitungen anderweitig nachweisbarer glossatoren darstellen. andererseits schöpften zwar die mit einander verwandten nrn* DCCCCXXXIX—DCCCCXLII *grofsen teils aus einzelglossaren, die uns tatsächlich vorliegen: aber der inhalt dieser einzelglossare ist so vielfach vertauscht und selbständig verarbeitet, dass jede auflösung der nrn sich verbot. galt es doch überall, den individuellen character der einzelnen glossenformen tunlichst zu wahren.*

Trotzdem ich die Altdeutschen gespräche ausschloss, welche gleich den interlinearversionen besser in einer sammlung der kleineren ahd. sprachdenkmäler ihre unterkunft finden, ist der dritte band sehr umfangreich ausgefallen, weil, wenn nicht jede übersichtlichkeit entschwinden sollte, die vielen recensionen des elften buches des Summarium gesondert vorgeführt werden musten. ich war daher genötigt, mit dem raum haushälterisch umzugehen. beim Summarium wurde deshalb

nicht der volle wortlaut des lateinischen textes mitgeteilt, sondern zumeist nur die glossierten stichworte: den ort der auslassung markieren jedes mal drei puncte. ich verhehle mir nicht, dass unverkürzter abdruck dem nachprüfenden willkommener gewesen wäre; aber ich ersparte mit meinem verfahren mehrere bogen. ferner sind die verweiszahlen wesentlich eingeschränkt worden. ihr wert ist bei diesem bande ohnehin ein recht relativer, da in ermangelung fester citate und wegen der differierenden wortfolge das aufsuchen der correspondenzgll. zeit und mühe kostet. systematisch und vollständig habe ich allein in dem abschnitt Mischungen auf die einzelglossare verwiesen; sonst fanden verweise nur dort statt, wo die existenz naher verwandtschaft oder, wie bei den kräuterglossaren MVIII—MXXIII, *das vorhandensein einer bestimmten entwickelungsreihe dargetan werden sollte. öfter als vordem unterschied ich benachbarte nrn durch exponenten: das hatte den vorteil, dass statt vielstelliger ziffern mit einfachen buchstaben verwiesen werden konnte. hingegen sind häufiger als in den früheren bänden worte mitgeteilt, welche keine oder nur lateinische glossierung erfahren haben: ich meinte dadurch den vergleich mit andern fassungen oder mit künftigen funden zu erleichtern. Diefenbachs Glossarium, ohne das die bearbeitung dieses bandes gar nicht hätte gewagt werden können und dem ich dankbarst verpflichtet bin, setze ich überall stillschweigend voraus; ausdrücklich angeführt habe ich es nur in besondern fällen oder wenn ich ihm widersprechen muste.*

B 114 *und der Herradcodex, die verlorene SBlasier hs. des Summarium, endlich verschollene bll., die sich früher im besitze der Heidelberger universitätsbibl., dr Noltes und der privatbibl. s. maj. des königs zu Stuttgart befunden hatten: für sie war ich auf die vorhandenen abdrücke und collationen angewiesen.* [*unmittelbar vor abschluss des druckes machte mich WMeyers Verzeichnis der hss. im preufsischen staate* 1, 3 (1894), 508 *auf ein aus WMüllers nachlass in den besitz des Göttinger deutschen seminars übergegangenes blatt mit den Versus de arboribus volucribus bestiis aufmerksam. MHeynes freundschaft habe ich zu verdanken, dass es für den nachtrag noch verwertet werden konnte.*]

Unter den hier zum ersten mal bekannt gemachten denkmälern besitzen besondern wert die rolle der gräflich Mülinenschen bibliothek und der Cheltenhamer codex 7087. *nachdem auf jene mein ehemaliger Strafsburger college, der pharmacolog FAFlückiger, den mein dank leider nicht mehr unter den lebenden trifft, mich hingewiesen hatte, verstattete die güte des herrn grafen FvMülinen ihre freieste benutzung an meinem wohnort. den Marienfelder gll., deren identität mit den von Graff* Tz. *genannten zu erkennen nicht schwer fiel, hatte ich seit jahren vergeblich nachgespürt: eben waren ihre in Kindlingers abschrift geretteten dürftigen auszüge gedruckt (s.* 421 *f), als mich dr RPriebsch mit der nachricht von der wiederauffindung des originals überraschte. im februar d. j. reiste er von neuem eigens zu dem zwecke nach Cheltenham, um den codex für mich auszubeuten, und setzte durch seine aufopfernde gefälligkeit mich in die angenehme lage, das umfangreichere und sprachlich wichtigere der beiden glossare der hs. noch am schluss des bandes zu veröffentlichen; das kürzere alphabetische wird im nächsten seine stelle finden.*

Doch auch sonst habe ich anlass zu freudigem dank. in erster linie gebürt er hrn geheimrat KWeinhold, dessen geneigte fürsprache die k. preufsische akademie zu reichlicher subventionierung auch dieses dritten teiles bestimmte und damit sein erscheinen ermöglichte. sodann hrn director GvLaubmann und den

beamten der k. hof- und staatsbibliothek zu München, die in hochherziger liberalität und unermüdlicher aufmerksamkeit meinen wünschen jeder zeit nicht sowol nach- als zuvorzukommen bestrebt waren. JSeemüllers bereitwillige hilfe versagte niemals, wie oft ich sie auch in anspruch nehmen mochte. geheimrat EDümmler und mein freund WMeyer begleiteten das werk mit reger anteilnahme und steuerten wertvolle notizen bei. endlich hat ESievers von den meisten bogen eine revision gelesen: manche emendationsvorschläge gehen auf ihn zurück oder verdanken seinen zweifeln ihren ursprung.

Zahllos waren die schwierigkeiten, welche dem verständnis der in diesem bande enthaltenen gll. sich entgegenstellten. sie aufzuhellen habe ich um so angelegentlicher getrachtet, als selbstvergessende wissenschaftliche arbeit allein über tage schwerster trübsal mich hinwegzuheben vermochte. genug der rätsel harren aber noch ihrer lösung: mögen andere hier glücklicher sein als ich.

breuitati studere omnimodis censuimus, quo etiam inerti uel[1] labili memorię consuluimus.[2] Si quis uero aliter sapiens in ethimologia uariorum uocabulorum dubitat, librum ethimologiarum[3] ysidori perlegat; et si in nostro summario ambigit, illius testimonio fidem adhibebit. SVMMARIVM autem nomen hoc opusculum forte[4] non inconuenienter habebit, eo quod multarum rerum summam tangit et nomina perstringit. Porro librum primum de grammatica posuimus, quia, qui litteras uel formas dictionum ignorauerit, aut uix aut nullo modo aliam artem assequi ualebit. Sic etiam ceteris[5] libellis aliquam congruentem formulam nisi sumus[6] dare, ut in sequentibus titulis lector poterit[7] considerare. Nam primus liber, ut diximus, continet de grammatica .i. De voce, De littera et de partibus orationis.[8] Secundus[9] de uariis dogmatibus .i. de disciplina, De metris, De compoto et de musica.[10] Tercius[11] de omni quod uiuit, sentit et discernit. Quartus[12] de omni quod uiuit per uiriditatem, ut est de arboribus, de herbis. Quintus[13] de omni quod mouetur, sed non uiuificatur, hoc est de mundo, de uentis, de fluminibus. Sextus[14] habet de his quę inueniuntur sub terra .i. de lapidibus, de metallis. Septimus[15] de receptaculis hominum, in quo est de urbibus, de edificiis. Octauus[16] texitur de uariis officiis et nationibus hominum, uti est de clericis et sacris ordinibus. Nonus[17] de uestimentis et alimentis et potibus et uasis escariis. Decimus[18] de instrumentis artificum, de bellis, de[19] morbis et remediis. Vndecimus[20] de interpretatione quorundam uerborum in scripturis repertorum, qui per alfabetum dispositus est. Sane in interpretatione nominum quem certum testem adhibeam, non inuenio, sicut in ethimologia ysidorum[21], nisi uaria exemplaria, quę licet non[22] usquequaque approbata, tamen non omni modo etiam improbanda; unde peto, ut, si quid in hoc est erratum, a diligentioribus fiat correctum.

[1] *mit diesen verweisen auf Heinrici Summarium (sie wurden nur bei übereinstimmung des lat. stichwortes in casus und numerus gegeben) soll nicht behauptet werden, dass Herrad jedesmal den betr. abschnitt des Summarium ausgeschrieben (dies ist nur dort mit sicherheit anzunehmen, wo längere reihen von parallelen vorliegen), wol aber, dass sie ihre weisheit grofsenteils aus einem exemplar jenes werkes geschöpft habe. dass sie auch das* XI *buch vor sich hatte, machen am meisten die verbalformen in der* I *p. sg. praes. wahrscheinlich*

ANHANG.

ZUM SUMMARIUM.

Die sammlung der ahd. gll. soll wesentlich grammatischen und lexicalischen zwecken dienen. innerhalb aller derjenigen nrn, für welche mehrere hss. in betracht kommen, wurden deshalb die zahlreicher bezeugten deutschen worte den minder häufig oder nur einmal belegten vorangestellt; ebenso erhielten formen mit vollen endungen und ableitungssilben ihren platz vor den geschwächten angewiesen. daher wechselt die folge der benutzten hss. fast ansatz für ansatz. dieser umstand erschwert die richtige erkenntnis ihrer filiation. dazu tritt bei dem oben s. 58 *ff zum abdruck gebrachten Summarium der vorzug, welcher den unter sich nahe verwandten hss. AB als den vollständigsten repräsentanten des werkes eingeräumt ist. ich möchte deshalb hier, ohne auf manche schwierige fragen einzugehen, zu welchen das vocabular anlass bietet, die wenigen ergebnisse zusammenstellen, welche ich über seine geschichte ermittelt zu haben glaube. um mich dabei tunlichster kürze befleifsigen zu können, verzichte ich auf angabe solcher orthographischen unterschiede der codices, welche für den jeweiligen zweck des citats belanglos sind. vollständigkeit der belege lag nicht in meiner absicht.*

Die hss. der ersten zehn bücher zerfallen in zwei klassen. auf der einen seite stehen ABFOP und die SFlorianer kräuternamenexcerpte (s.* 592 *anm.), auf der andern CEGHIKLQS und die redaction* B. *das beweisen folgende stellen:* 68, 69 Diuortium schidunga *ABF* — sunderunga *CEGHQ* + B. 69, 19 Caluaria gebel *ABF* — gibilla, gebilla *CEGHQ* + B. 76, 49 Hircelli *ABF* — Hircellus *EGH* + B. 85, 52 Pellicanus husegŏm *ABF* — sisegŏm *CEGH* + B. 88, 33 Turdela droschela *ABF* — drorcha *resp.* droscа *CEGH* + B. 89, 17 Castros wisel *ABF* — wisun *CEGH* + B. 89, 20 Fugus threno *ABF* — dreno *CEGH* + B. 89, 55 Cicada heimo *ABF* — *fehlt.* 90, 41 Gurgulio engerlinc *ABF* — engerinc *CEGHL* + B. 91, 1 Uua bere uel drubo *ABF* — berekorn uel drubo *oder* berekorn *allein CEGHLS* + B. 91, 62 Saltus walt *ABF* —

Dem reichlich mit accenten versehenen archetypus der ersten klasse war angehängt ein alphabetisches lat.-deutsches kräuterglossar (MX). *in ihm herscht der gleiche lautstand und dasselbe verhältnis der hss. wie im Summarium selbst: seine deutschen worte rühren daher möglicher weise vom redactor des klassenarchetypus her, dem ich auch den metrischen prolog zuzuschreiben geneigt bin, welcher auf eine paraphrase des prosaischen hinausläuft. trifft diese annahme das wahre, so besitzt der durch das akrostichon der poetischen vorrede allein bezeugte name* Heinricus *— wenn anders derselbe den autor bezeichnen soll — geringe glaubwürdigkeit.*

Bei der zweiten klasse erhellt auf den ersten blick, dass redaction B* *sich von einer dem codex G nahe verwandten hs. abgezweigt hat. nur G und* B *gemeinsam sind folgende lesarten:* 79, 1 blanc — blanc ros. 79, 15 svarz — svarz ros. 79, 23 bruniz (bruz B) — brun. 84, 44 Rana — Rane. 85, 15 ar uel arin — aro. 89, 45 Scarabeus — Scarabei. 113, 8 *ff die mit* -roni *gebildeten windnamen.* 115, 57 Venedia — Venediũ, Venedũ. 116, 38 sestemont — septimont. 116, 61 slif — hali. 122, 14 *zusatz von* uel tuerhakes. 122, 18 Dolabra — Dolabrum. 123, 23 uel sehselin — uel snitesahs. 124, 10 Suburbana (*so Isidor*) — Suburbia. 124, 54 winhus uel chram — tauirna. 124, 65 Curta uel curtis *G*, Curta B — Curtis *ABCE*. 125, 20 dol — tul. 125, 27 Argentina *vor* Spira. 126, 35 Agistudium — Egistudium. 126 *überschrift* ciuitate (*auſser R*) — ciuitatĩbus. 128, 66 winkilstain — eggistein. 129, 70 tabillin uel britir — breter. 131, 9 romari *zugesetzt, indem* waleha *der andern hss. für die gegengl.* Rutuli *verwertet wurde.* 131, 60 lutinzara — lutizin. 132, 49 engillander — engilsahsun. 132, 53 Danai — Dani. 133, 50 lerrarin — lerari. 134, 37 Centurio .i. centinar — *fehlt.* 135, 4 uel scoldinar *zugesetzt.* 138, 5 Segeta — Sageta. 138, 30 scubuzo — scuochbuozare. 138, 32 lederar — ledergarwere, ledergarwo. 139, 41 *zusatz von* uel holzwercman. 139, 62 stiermaister — sturo. 140, 28 Sellolarius — Sellarius. 140, 51 uehera — uahare. 141, 40 hurmacho — huormachare. 144, 34 Expastus frezziter — *fehlt.* 145, 36 Gibberosus — Gypper uel gypperosus. 146, 53 Periscelides klenzun — *fehlt.* 151, 10 uel afdirhemidi *zugesetzt.* 152, 41 stoz uel ballo — bal (*so freilich auch N*). 152, 45 ledirhos — ledirhosun uel beinberga. 153, 35 krephilin — kraphun. 153, 57 rowez — rou. 156, 55 Tractarius — Cantarius uel tractarius. 157, 18 milhvas, milcfaz — melcvaz. 159, 43 kanf uel ainwic — einwige. 160, 48 berefreit — berfrit. 163, 50 gnarrum — gnarrun. 164, 5 sceldel — scaltscif.

* *über die principien, nach denen die umordnung* B *vorgenommen wurde, lässt sich schlecht urteilen, weil die beiden vollständigen hss. dieser recension leider verloren sind und Gerberts abdruck, wiewol für seine zeit keineswegs ungenau, mindestens hinsichtlich der bucheinteilung bedenken erweckt. das freilich erkennt man unschwer, dass der redactor eine systematischere folge des zusammengehörigen anstrebte, ohne sie jedoch zu erreichen, und dass ihm die geistlichen interessen im vordergrunde standen.*

Ein teil der besprochenen klassenunterschiede beruhte darauf, dass verschiedene deutsche übersetzungen zur widergabe desselben lat. wortes verwendet waren oder dass die eine klasse ein der andern mangelndes zweites glossem bot. in manchen fällen mag diese doppelheit ursprünglich, in manchen erst später eingetreten sein: generell lässt sich darüber keine entscheidung treffen. nur das sieht man, dass übergeschriebene gll. vielfach in den text gerieten. so erklärt sich die schon erwähnte verschiedene stellung von uel cleno 89, 52 *in ABF und CEGH* + B. *ähnlich verhält es sich* 123, 12 *ff:* uel *in BO ist unsinnig, es setzt die in CEG überlieferte zweite gl.* houwa *voraus. ursprünglich war geschrieben* ł hŏwa ietisan, *daraus gieng C* ietisan ł hŏwa *hervor. geriet aber* ł *in die untere zeile, so entstand E* ł iectifan. hûa *oder mit weglassung der interlineargl. die lesart von BO* ł ietiseen; *AH tilgten dann auch gleich* B *das gegenstandslose* ł. 97, 9 *weist C die doppelgl.* bucholter (*verschrieben* hûcbolī) uel scerlinc *auf: daraus leiteten ABEF* bucholter, *GHLS* + B scerlinc *ab.* 69, 63 stirna vel dinna B, stirna *ABF,* tinna *CE.* 68, 11 *ff* eidum *C* + B, eidem ł dohterman *H,* dohtirman *die übrigen* (*denn in A ist* eidem *zusatz anderer hand*). 90, 59 *hat E* drappo *mit übergeschriebenem* chāp, *H* drappo. uel cahp (*corr. zu* crapho *von anderer hand*), *C unter fortlas-*

Immerhin dürfte aus meinen erörterungen hervorgehen, dass unter sämmtlichen hss. des Summarium C die wichtigste stelle einnimmt und dass alle gll. oder wortformen, in welchen es entweder mit B *oder mit ABE übereinstimmt, für genuin zu gelten haben. freilich die echte gestalt des werkes besitzen wir auch in C nicht, ganz davon abgesehen, dass dieser codex durch zahllose willkürlichkeiten und nachlässigkeiten entstellt ist. das beweisen die auszüge einer hs. des Summarium (das sie* Aurea gemma *benannt zu haben scheint — anders urteilt Schorbach QF* 74, 165*f.* 276), *welche Herrad ihrem Hortus deliciarum einverleibte. ich verwerte von ihnen nur die zusammenhängenden und deshalb sichern. die Herrad vorgelegene hs. stellt sich mit* ihsille 405, 46 *zu CEH* + B, *mit* vaterheim 406, 48 *zu CE, kennt aber* 406, 53 venedien, 406, 56 septimunt, 407, 26 art, 407, 28 tunga, 407, 29 egunge, 407, 31 brache *nicht die G und* B *gemeinsamen abweichungen. wenn sie also* 406, 14 *ff die sonst nur in AB und* B *bezeugten monat- und jahreszeitennamen und zwar in einer gestalt, die sich mehr mit* B *als mit AB berührt, enthält, wenn sie ferner gll. bringt, die aufserdem blofs in* B *vorhanden sind (zb.* 405, 48—50), *so wird damit nicht nur die existenz einer vollständigeren und der urgestalt des Summarium näheren hs. dargetan, sondern zugleich erwiesen, dass mindestens ein teil der mehrgll. der redaction* B *dem werk von anfang an zugehörte.*

Das elfte buch ist in zahlreichen fassungen auf uns gekommen: nur zwei derselben, die in C resp. Q (a1) und die in AB resp. Nun sind aber die gll. habt haben: denn a2 und b stimmen allen andern redactionen gegenüber in vielen einzelheiten überein, zb. in dem fehlerhaften lemma Licuta *statt* Cicuta 244, 69. 278, 61, *in dem seltsamen* Parcherdum 249, 47. 283, 3, *in* Municipale congestum 247, 36. 280, 62 *für* gestum *von dek, in der übersetzung von* Gremium *durch* scoz 240, 11. 276, 3, *wo deg* amat *bieten. man könnte nun denken, dass das elfte buch ursprünglich nur in der ersten hssklasse die form a2, in der zweiten die form a1 besessen hätte: dem widerspricht aber nicht nur die hs. Q, sondern auch die SFlorianer* XI, 588 *saec.* XIV. *ich habe sie ihrer zahllosen jüngeren zusätze wegen für den text nicht verwertet; aber die auszüge in den Wiener jbb.* 41 *Anzeigebl.* 23—26 *genügen völlig, um ihren platz in der überlieferung festzustellen. sie enthält, stark gekürzt, Summarium* II, 18—IV, 7 *und* XI: *mit* Diuorcium sunderunge *wird ihre zugehörigkeit zur zweiten klasse erwiesen; ihr elftes buch aber stimmt durchaus zu a2, wie dasselbe in Qab vorliegt.*

Den redactionen a2b gegenüber bilden aber deg auch in so fern eine besondere klasse, als ihre wortfolge bis zum buchstaben S *incl. in allem wesentlichen die gleiche, vielfach von a2b abweichende ist. über* T *bis* Z *lässt sich nicht so sicher urteilen, denn hier fällt e aus, d aber hat diese buchstaben aus redaction b herübergenommen, der es auch am schlusse von* A, B, D, G, L, P *und am anfang von* M *zusätze entlehnte. alle diese fassungen und a1 sind so angelegt, dass innerhalb jedes buchstaben hebräisch-biblische namen voranstehen; es folgen griechische worte, endlich lateinische. ein princip, nach welchem die worte dieser drei categorien in sich geordnet wären, lässt sich für* A—O *nicht erkennen, wol aber für* P—S (*über* T, U *nachher*). *dort besteht nämlich eine ordnung nach den beiden ersten buchstaben (also* Pa, Pe, Pi, Po, Pu, Pl, Pr; Sa, Se, Si, So, Su, Sc, Sp, St), *wobei fehler nicht mangeln: a2bdeg haben gleichmäfsig* Pumen, *nur AB setzte das richtige* Rumen *dafür, nur A verwies dem entsprechend die gl. ins* R. *aber die verba reihten an der ihnen gebürenden alphabetischen stelle in* P—S *blofs a1deg ein; in a2b verblieben sie auch hier an der stelle, welche sie in* A—O *eingenommen hatten, dh. zumeist am schluss der einzelnen buchstaben. daraus folgt einerseits, dass a1 mit deg näher verwandt ist (und zwar kann es nur als ein auszug aus deg gefasst werden), andererseits, dass a1deg eine überarbeitung gegenüber a2b darstellen. diese art der überarbeitung ist dann fortgesetzt in den fragmenten h, i, k; in ihnen erscheint eine ordnung nach den drei ersten buchstaben innerhalb jeder der drei oben genannten categorien für das ganze alphabet durchgeführt; dabei geriet* 349, 4 Malagma *fälschlich unter die gruppe* Mul. *aus einer solchen hs. scheint auch bl.* 49^{b} *des codex b von a2 (s.* 250 *anm.* 1) *genommen zu sein.*

Wäre das elfte buch des Summarium ein einheitliches werk, dh. hätte sich der verf. sein material selbständig zusammengesucht und geordnet, so liefse sich die verschiedenheit der wortfolge vor und nach dem P *schwer begreifen. daher halte ich es für wahrscheinlich, dass er ein fertiges vocabular, von dem uns ausläufer in deghik vorliegen, übernahm, und zwar auszugsweise. denn die in ABC überlieferte, von dem wortlaut der vorrede* 63, 20 *abweichende überschrift des* XI

buches De interpretatione quorundam uocabulorum superius pretermissorum *passt zwar für die fassung a1, jedoch nicht für a2, weder in der gestalt Qab noch vollends in der form AB. diese überschrift dürfte AB aus a1, das von ihm mit a2 zusammengeschweifst wurde, entnommen haben. wenn demnach a1 höheres anrecht darauf zu besitzen scheint, für das ursprüngliche* XI *buch betrachtet zu werden, so bleibt wol nur die annahme, dass a2 irgend einer hs. des Summarium als selbständiges glossar einmal beigegeben wurde: darauf bestanden entweder a1 und a2 neben einander (so Q und vorlage von AB) oder a1 räumte dem vollständigeren a2 den platz (so SFlorian). auf ein sicheres resultat wird man so lange verzichten müssen, bis reichlicheres material vorliegt: denn alle hss. aufser AB ermangeln des ersten buches, alle aufser ABC des prologs (der überdies in C nachträglich von anderer hand eingetragen ist) und die meisten brechen das werk vor seinem schlusse ab oder bringen es in gestörter ordnung.*

Merkwürdig und mir nicht sicher deutbar ist auch der umstand, dass die redactionen a2 und b (letzterer schliefst sich d an, s. oben) in den buchstaben T, U *mehrere alphabetische reihen hinter einander aufweisen, nicht blofs eine einzige; und während hier g (e fehlt leider) zwar im allgemeinen continuierliche folge der anlaute zeigt, hat es doch zum schluss nach dem anlaut* Ur Vitrum, Vitellum, Veredarius, *darin auffällig mit b stimmend. — reichlich begegnet bei den deutschen gll. von e, zumal in der anfangspartie, die sigle* t̄ *oder* t = teutonice; *auch die hss. AB von a2 bieten einmal* 249, 50 teut̄, *zweimal* 256, 17. 23 t. *ob diese bezeichnungen alt sind und schon im original standen, vermag zwar mit sicherheit nicht entschieden zu werden, hat aber deshalb einige wahrscheinlichkeit, weil* teut̄ *öfters auch in dem grofsen vocabular der Engelberger hs.* 6|8 *auftritt, von dem Bartsch Germ.* 18, 66—68 *excerpte geliefert hat: denn in ihm haben wir vermutlich eine mit zusätzen vermehrte durchalphabetisierung sämmtlicher elf bücher des Summarium nach den drei ersten buchstaben zu sehen.*

Die hss. der redaction g sind einander nahe verwandt und weisen auf ein stark verderbtes original zurück (vgl. zb. 329, 47 Balelena. 330, 63 Cubutus. 331, 9 Cale *statt* Calx. 331, 32 ciolus *statt* ciclus. 332, 25 Casilide *statt* Casidile. 332, 43 Cetramentum balco *statt* blacha. 332, 64 mirmínsul. 333, 5 brisentia *statt* bisentiu. 334, 17 witfalco. 335, 7 finieffa *statt* sneffa. 336, 37 Hamerus. 338, 39 kinnebracco. 340, 28 gesprino. 341, 41 Petrosalinū. 342, 14 Pirus birchun *statt* birboum. 343, 24 hinteli. 344, 34 lach ingrau wer *statt* lachin grauwez. 344, 42 rossatel *statt* satelros. 346, 57 Trifbula): *überall hat hs. c die fehler getreu conserviert, während ab (die* 345, 20 *eine in c vorhandene zeile übersprangen) mittels rasuren und correcturen zu bessern suchten, zb. aus* ísaro c 340, 40 *unsinniger weise* Isaro, insaro *machten. diese redaction zeichnet sich auch dadurch aus, dass sie hinter jedem buchstaben eine zusammenstellung von derivativen enthält, welchen beim* A *ein eigener prolog vorangeschickt ist:* Incipit prologus de deriuatiuis. retinere. merito perspicaciter in uno uolumine has deriuationes inserere mihi placuit. quantum facultas ingenii recordabitur.

Das fragment c ist ein dürftiger auszug aus b, zumeist den schlusspartien der einzelnen buchstaben entnommen. f geht, wie die einordnung des verbum Sartio 327, 67 *zeigt, von deg aus, hat aber, namentlich am anfang der buchstaben, viel fremdes eingemengt. in ähnlicher weise wurde d durch pflanzennamen erweitert.*

Das Summarium kann erst nach dem jahre 1007 *entstanden sein. denn sein städtecatalog, der, abgesehen von Aachen, nur bischofssitze aufführt, nennt* 125, 59 *bereits Bamberg. benutzt hat es* 88, 54—68 *und wahrscheinlich auch* 88, 69—89, 9 *die Versus de volucribus* 12. 14.
